

About.

Trusted Accela Partner. Proven digital innovator

Born in Lebanon in 2014, Cody Smart began as a vision to merge creativity with technology. By 2021, we expanded to the UAE, and in 2025 to Oman, growing into a trusted digital partner with offices in Dubai, Abu Dhabi, and Oman.

Today, we stand as a recognized Accela Partner and official reseller in the Middle East, helping governments modernize services and enhance citizen experiences through the Accela Civic Platform. Alongside this, we design and deliver AI-powered business solutions, immersive 3D platforms, interactive apps, and enterprise-grade systems that empower organizations to achieve more.

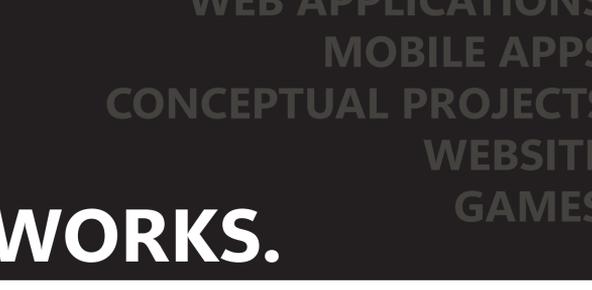

Our strength lies in our people – explorers, innovators, and change-makers who bring authenticity and creativity to every project. At Cody Smart, we don't just build technology; we craft digital journeys that transform the way communities, businesses, and governments connect with the future.

GOVERNMENTAL SOLUTIONS

Accela

Cody Smart is a recognized Accela Partner in the Middle East and official reseller of the Accela Civic Platform – the global leader in permitting, licensing, inspection, and regulatory software for governments.

Through this partnership, we help regional government entities digitize and modernize citizen services with:

- Implementation & Configuration
- System Upgrades & Change Requests
- Support & Maintenance
- Business Analysis & Consulting
- Integration Services
- Training & Enablement

We have successfully delivered projects across the UAE and wider Middle East, enhancing efficiency, compliance, and transparency for government agencies in areas such as licensing, inspections, holiday homes, and customs administration.

Certificate of Appreciation – Abu Dhabi Customs (Feb 2025)

In recognition of our strong partnership with Abu Dhabi Customs, Cody Smart was honored with a Certificate of Appreciation as a distinguished partner. This award highlights our role in delivering innovative solutions and exceptional services on Accela Framework, supporting Abu Dhabi Customs in achieving operational excellence and digital transformation.

AI SOLUTIONS

Smart MOM - Zaki

Zaki is Cody Smart's On-Prem AI-powered meeting management solution designed to help organizations capture, manage, and follow up on meetings with ease.

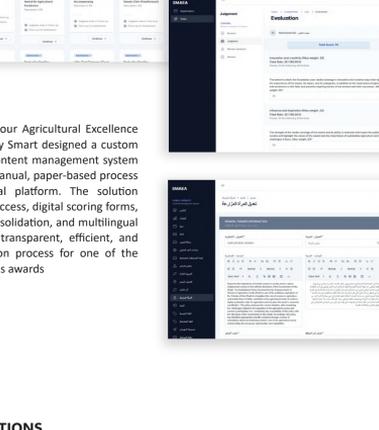

The platform combines real-time transcription, automated minutes, task tracking, and seamless integrations with collaboration tools, ensuring that discussions, decisions, and action items are always documented, searchable, and measurable. This enables organizations to save time, reduce manual errors, and improve accountability across teams.

WEB APPLICATIONS

SMAEA Judging Portal and CMS

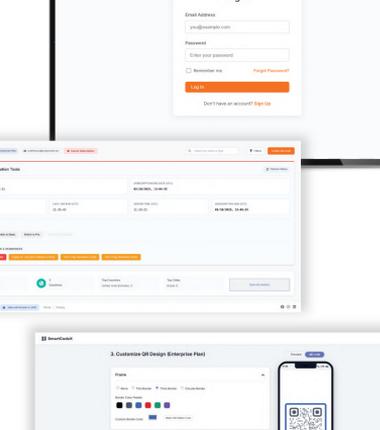

For the Sheikh Mansour Agricultural Excellence Award (SMAEA), Cody Smart designed a custom judging portal and content management system that transformed a manual, paper-based process into a secure digital platform. The solution featured role-based access, digital scoring forms, automated result consolidation, and multilingual support, ensuring a transparent, efficient, and streamlined evaluation process for one of the UAE's most prestigious awards.

WEB APPLICATIONS

Smart Block – Evolutions

EVOLUTIONS

Cody Smart created a next-generation online 3D sales blocking platform for Evolutions, redefining how real estate projects are visualized and sold. The solution integrates immersive 3D navigation, real-time unit availability, and Mapbox-powered geolocation to give buyers an interactive view of buildings, units, and amenities. With CRM integration, cloud hosting, and mobile responsiveness, the platform delivers a seamless, transparent, and engaging sales journey—empowering developers and brokers to close deals faster while enhancing client confidence.

WEB APPLICATIONS

Smart Code X

Cody Smart developed Smart CodeX, a powerful web-based platform that allows users to easily create, customize, and manage QR codes. The solution supports 14+ QR code types including payments, vCards, Wi-Fi, events, and more, with dynamic & static options. Users can personalize designs with logos, colors, and frames, and track engagement through a built-in analytics dashboard showing scans by country, date, and device.

With responsive design, secure data handling, and scalable cloud infrastructure, Smart CodeX offers businesses and individuals a fast, reliable, and visually customizable way to turn QR codes into smarter digital touchpoints.

MOBILE APPS

TRC Jordan

Cody Smart developed the e-Radio Spectrum Licensing mobile application for TRC of Jordan, providing a fully digital environment to manage radio frequency spectrum resources. The app allows users to apply for new, renewal, modification, or cancellation of licenses, track application status online, view and download electronic copies of granted licenses, and pay spectrum fees securely.

By automating end-to-end processes and enabling mobile access, the solution enhances efficiency, transparency, and convenience for applicants while supporting TRC's mission of modernizing spectrum management in Jordan.

MOBILE APPS

Al Quran App

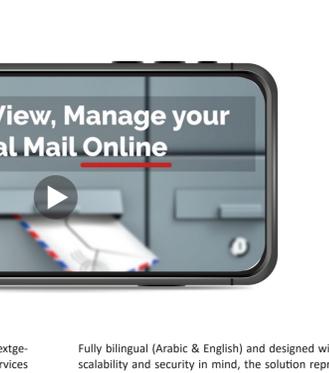

Cody Smart developed Al Quran App, a mobile solution that allows users to read the Holy Quran, listen to recitations, and access prayer-related guidance in one convenient platform. To encourage deeper engagement, the app also includes gamified assessments that let users test their knowledge of Quranic verses—combining learning, spirituality, and interactivity in a modern digital experience.

CONCEPTUAL PROJECTS

Smart Capture 360

Cody Smart developed Smart Capture 360, an advanced platform for project monitoring and stakeholder engagement. The solution transforms traditional static reports into immersive 360° virtual tours with bi-weekly progress updates, AI-driven change detection, and interactive timelines.

Stakeholders can explore sites remotely, access hotspots with multimedia content, and review historical progress anytime. By combining drone-based aerial mapping, interior 360° captures, and AI-powered visual analysis, SmartCapture360 delivers a living digital twin of construction projects. It enhances communication, streamlines reporting, supports marketing and leasing, and provides an irrefutable visual history of development—bridging the gap between on-site reality and stakeholder visibility.

CONCEPTUAL PROJECTS

Digital Mailbox

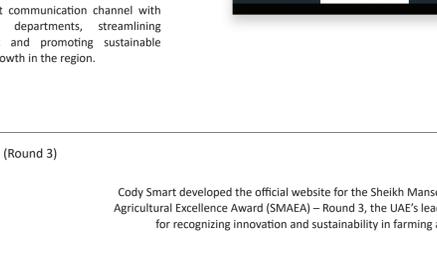

Cody Smart designed this concept as a next-generation digital mailbox and customer services platform. The idea was to create a centralized hub where users could manage accounts, track and send orders, upload and pay bills, and submit inquiries—all through a single, secure login. The conceptual platform includes a user-friendly dashboard, real-time tracking, order management features (forward, shred, scan, pickup), and built-in analytics and reporting tools.

Fully bilingual (Arabic & English) and designed with scalability and security in mind, the solution represents Cody Smart's vision of transforming traditional postal and logistics services into a streamlined, digital-first ecosystem.

WEBSITE

Al Buraimi Website

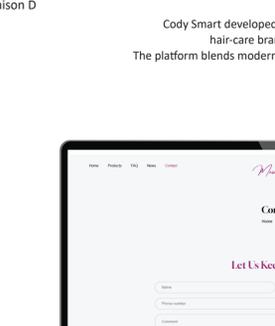

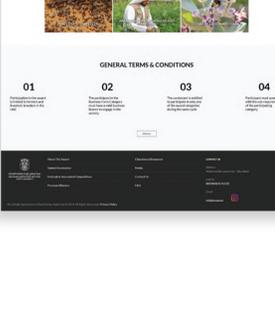

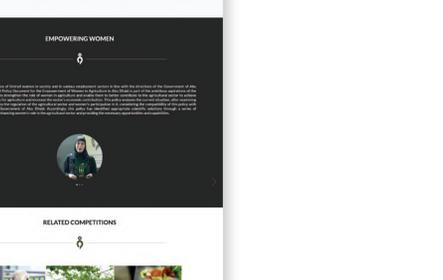

Cody Smart developed the official investment portal for the Al Buraimi Governorate, a bilingual digital gateway designed to attract and support both local and international investors. The platform highlights investment opportunities, strategic sectors, available land, and key government contacts, while also providing access to licensing guidelines, required procedures, and downloadable forms. With its intuitive design, it serves as both an information hub and a direct communication channel with government departments, streamlining engagement and promoting sustainable economic growth in the region.

Full bilingual (Arabic & English) and designed with scalability and security in mind, the solution represents Cody Smart's vision of transforming traditional postal and logistics services into a streamlined, digital-first ecosystem.

WEBSITE

SMAEA Website (Round 3)

Cody Smart developed the official website for the Sheikh Mansour Bin Zayed Agricultural Excellence Award (SMAEA) – Round 3, the UAE's leading platform for recognizing innovation and sustainability in farming and livestock.

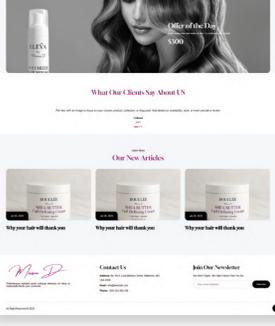

Endorsed by His Highness Sheikh Mansour Bin Zayed Al Nahyan, the site provided a userfriendly portal for online applications, award criteria, and event participation, including activities linked to the Sheikh Zayed Festival in Al Watba. Designed for clarity and accessibility, it streamlined registration, allowed users to log in securely with UAE Pass, and kept participants updated on deadlines and award news.

WEBSITE

Maison D

Cody Smart developed the official e-commerce website for Maison D, a premium hair-care brand dedicated to elegance, authenticity, and natural beauty. The platform blends modern design with seamless functionality, enabling customers to browse, purchase, and securely pay for products online.

With a clean, mobile-friendly interface, the website highlights Maison D's story-driven identity while providing intuitive navigation, product detail pages, and a smooth checkout process. Built with scalability in mind, it supports both brand storytelling and direct online sales, giving Maison D a strong digital presence and an engaging shopping experience for its customers.

GAMES

Al Ain Zoo - Shuffle Game

Cody Smart created the Safari Shuffle Game for Al Ain Zoo event, an interactive memory challenge designed especially for children and families. The game uses touch-based card flipping, where players match safari-themed pairs under timed conditions. With bold animal visuals, smooth animations, and engaging sound effects, it delivers both fun and cognitive skill-building. Multiple difficulty levels and a lively safari environment keep participants entertained and encourage lasting engagement throughout the event.

GAMES

Al Ain Zoo - Wild Run

As part of the same event, Cody Smart developed the Wild Run Game, a motion-based adventure where players control a 3D tiger through natural body movements. By leaning or jumping left and right players guide the animal through a forest setting, dodging obstacles and collecting coins within a timed session.

Featuring motion detection, real-time feedback, and immersive 3D visuals, the Wild Run Game offered Al Ain Zoo visitors an energetic, memorable, and family-friendly interactive experience.

GAMES

Smart Buzzer System for Tadweer Group

For Tadweer Group, we engineered a custom Smart Buzzer System designed specifically for an interactive trivia quiz game. The solution included three synchronized buzzers, all integrated through an Arduino-based control system.

The system was programmed so that when one participant presses their buzzer, the other two automatically lock to prevent simultaneous responses. After a 10-second cooldown, all buzzers reset and become active again, ensuring a fair and seamless game experience.

This setup delivered a reliable, fast-response, and engaging interactive tool that supported Tadweer's live activation needs and enhanced participant experience through smooth and coordinated gameplay.

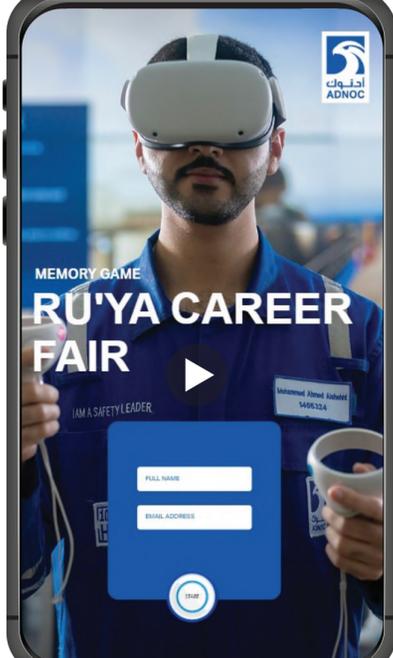

GAMES

Interactive Memory Game for ADNOC – Ru'ya Careers Fair

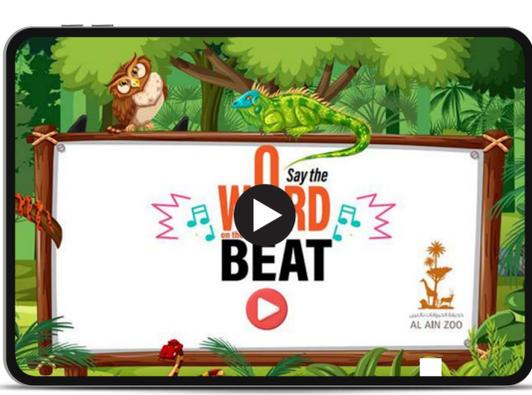

For ADNOC's participation in the Ru'ya Careers Fair, we developed a fully customized Interactive Memory Game designed to attract and engage visitors throughout the event. The game offered a simple yet highly captivating experience, encouraging players to test their memory, concentration, and speed.

The interface was built with ADNOC's branding, integrating clean card designs, smooth flip animations, and an intuitive layout suitable for all ages. Each interaction—from revealing cards to identifying matching pairs—was crafted to ensure responsiveness, clarity, and user enjoyment.

GAMES

Al Ain Zoo - Say The Word On The Beat

The Say the Word on the Beat Challenge is a fast-paced, interactive game designed to test players' focus, rhythm, and quick thinking in a fun, animal-themed experience. Participants are challenged to say specific words out loud, perfectly on the beat, following a dynamic sequence inspired by different animals. As the game progresses, the rhythm becomes faster and the animal sequence changes, increasing the difficulty level and keeping the experience exciting and competitive.

To power this interaction, we implemented AI-driven sound and voice detection technology

that listens in real time, analyzes the spoken words, and matches them against the required beat and sequence. The AI engine determines accuracy instantly — deciding whether the player wins or loses and retries. The result is a highly engaging, hands-free experience that blends voice interaction, rhythm, and AI intelligence, creating a memorable game that attracts crowds, encourages repeat play, and delivers both entertainment and innovation at live events.

THANK YOU
